### Movie gallery update

Our latest flash movie update is called "Four Season" . It is a picture slideshow with music from the celebrity guitarist Erik Borelius and photo from the photographer Samuel Arnfjell.

The four seasons reflects the natural drama taking place each year in the northern hemisphere and Lapland. All seasons are magnificent and have their own charm and appeal. It is hard to say which of these seasons is the most magnificent. The autumn give you the scented brilliant colours. The winter offers ice and snow, the northern light and the grip of darkness. The spring with exploding glittery spirit of life. The summer with the midnight sun and access to natural scenery found nowhere else. [Link - Movie gallery](#)
